- ***Tips:***
  - When using multiple cameras in the field remember to switch to the next cameras Wi-Fi signal first prior to viewing.
  - Find a simple "Wi-Fi settings" App to use as a shortcut for easy switching of Wi-Fi's.
  - Finding your camera after dark; look for small red glowing light we put in the camera's power head or point the camera towards you and track your own approach.
  - When trimming small trees around your game trails cut them off 2 to 3 feet high and use them as camera pedestal's.
  - Start out each day afield with your phone and camera fully charged.
  - Your BlindSPOT camera can also be charged using a portable smartphone power bank.

It's a LiveCAM™ so get creative..!
